

Concept Phase Weekly Sprint Burndown Charts

Sprint 1: 6/10 – 10/10

In this sprint, we created all our tasks and added them to the board however, we didn't start moving tasks till halfway through the sprint. This sprint was used to conduct research and plan how we wanted to create the app. At this time, we also did not know how to include weekends into the sprint and the bulk of the work was done during Saturday and Sunday.

Sprint 2: 12/10 - 17/10

In this sprint, we created all our tasks and added them to the board. Some tasks were not completed on time but instead of moving them back to the task board, we just ended the sprint. We have learned that if we are unable to finish work, we've assigned ourselves before the sprint ends, it's important to move it back to the task board.

Sprint 2		Resume this sprint	Completed
Team 1		17 hours completed	
Santos	5.5 h	Teri	6.5 h
Desmond	9.5 h	Kamil	1 h
Conor	3.5 h		
Mahara Journal (Conor)		0.5 h	Sprint completed
Add to the MoSCoW document		0.5 h	Sprint completed
Plan next sprint(sprint 3)		0.5 h	Sprint completed
Mahara Journal (Teri)		0.5 h	Sprint completed
Research relevant security needed		2 h	Sprint completed
DB Functional and Non Functional Requirements		1.5 h	Sprint completed
Set up individual Mahara Page - Santos		0.5 h	Sprint completed
Look at Previous Projects		1 h	Sprint completed
Look into backend systems used in previous year's projects		2 h	Sprint completed
Set up a weekly meeting		0.5 h	Sprint completed
Setup React Native Workspace with Expo		1 h	Sprint completed
Create Entity Relationship Diagrams		2 h	Sprint completed
Meeting With Mabel		0.5 h	Sprint completed
MoSCoW		1.5 h	Sprint completed
Look at Similar Apps		1 h	Sprint completed

Sprint 3: 18/10 - 24/10

The goal of this sprint was to meet Mabel and prioritize the requirements of the project. That means we had to gather all our research and discuss with Mabel what the app will look like. We still had issues with getting all our tasks done this sprint and the bulk of the work was done towards the end of the sprint.

Sprint 3		Resume this sprint	Completed
Team 1		11 hours completed	
Santos	3 h	Teri	3.5 h
Desmond	2.5 h	Kamil	0 h
Conor	2 h		
ICA1 (Teri)		2 h	Sprint completed
Mahara Journal (Conor)		0.5 h	Sprint completed
Create AWS Database		1.5 h	Sprint completed
Desmond - Mahara Journal		0.5 h	Sprint completed
Contact Mabel to Prioritize Requirements		1 h	Sprint completed
Create mobile emulator		2 h	Sprint completed
Research React Native - Desmond		2 h	Sprint completed
Santos Odgle - Mahara Journal week 6		1 h	Sprint completed
Mahara Journal Week 6 (Teri)		0.5 h	Sprint completed

Sprint 4: 26/10 - 1/11

The goal of this sprint was to get the foundations of the project set up. And to finish of our prototypes and personas. Most of the work is done towards the end again and we once again failed to remove tasks that we could not complete in time.

Sprint 4		Resume this sprint	Completed
Team 1		10.5 hours completed	
Santos	0 h	Temi	0 h
Desmond	6 h	Kamil	2.5 h
Conor	2 h		
Design Initial Prototype - Desmond		4 h	Sprint completed
Set up AWS EC2 instance.		2 h	Sprint completed
Mahara Journal - Desmond		0.5 h	Sprint completed
Create User Personas for prototype		1.5 h	Sprint completed
Learn React Native		2 h	Sprint completed
Mahara Journal - Kamil		0.5 h	Sprint completed
